

SPRING INTO ACTION!!!

Now that our very cold, wet winter is mostly behind us, it's time to warm up to the spring weather (if you don't get blown away) and take action.

Here are some ideas from bettruegreen.com:

- **Create a bird haven in your garden.**
Plant a mixture of local native trees and shrubs, and provide fresh water with a bird bath or pond.
- **Grow your own organic produce.**
Plant garlic or marigolds to control pests, protect soil and water quality, and reduce potential health risks.
- **Recycle (compost) all your green waste.**
Reduce your household waste by up to 40 per cent, and improve your soil and the vigour of your plants.
- **Swap your petrol-gussling, polluting lawnmower.**
Lawnmowers can generate 40 times the emissions of a car, so trade it in for a manual or electric alternative.
